THE LIST OF ELEMENT FOR ASSEMBLING MIRRORS

BAIL WITH FOUR SUCKERS

MIRROR „A”

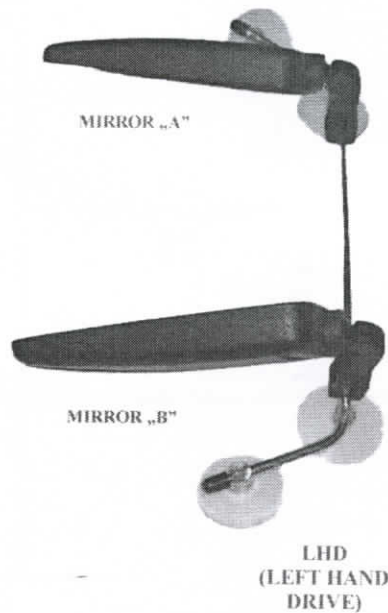

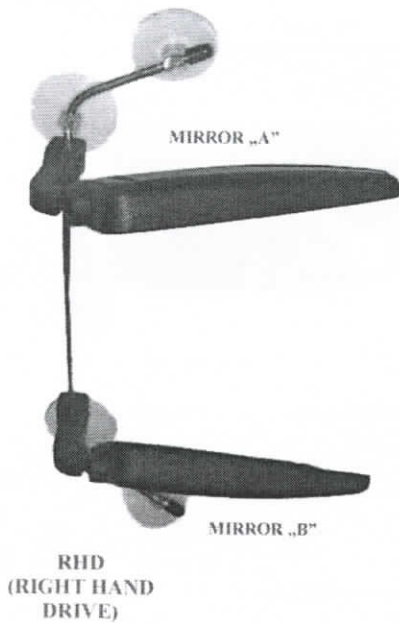

MIRROR „B”

PERISCOPIC CAR MIRRORS KRUGOZOR

INSTALLATION MANUAL

Taking into consideration the fact that one of the mirrors zooms the image the installation depends whether Krugozor will be used in a RHD or LHD car. In case of RHD (Right Hand Drive) car, the bail is to be placed with suckers directed right (photo below on the left) and then mirrors screwed on using screws from the assembling set. In case of a LHD car - bail is to be placed with suckers directed left (photo below on the right) and then mirrors screwed on in accordance with the manual below.

ADVICE: The mirrors are to be installed on rough bail surface and ought not be turned too strongly as it might cause difficulty in adjusting the mirrors. First of all, adjust mirrors in your cars and after that tighten up the screw.

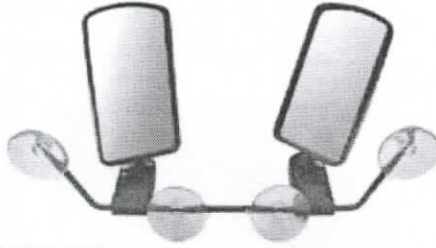

PERISCOPIC CAR MIRRORS KRUGOZOR

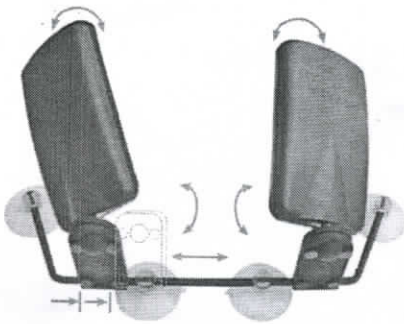

MANUAL

MIRRORS INSTALLATION MANUAL:

Krugozor is an universal device which might be used in the right hand drive cars (RHD) as well as left hand drive cars (LHD). Installation manual in both cases is the same.

MOUNTED CAR MIRROR KRUGOZOR

Before the installation the window screen ought to be cleaned in the place of montage to assure highest adherence. The mirror is to be installed on the front bottom part of a screen at passenger's side. After the installation the mirror is to be adjusted in such a way that the visibility in the bottom "B" mirror would be the highest possible for the driver. It is recommended to place a car behind other parked car within 3-5 meters distance and after that adjust the visibility to your own needs. If some car elements or other undesirable objects are reflected in the bottom mirror it is supposed to be moved closer to yourself.

Krugozor Polska thanks for buying Krugozor mirror and wishes safe journey!
